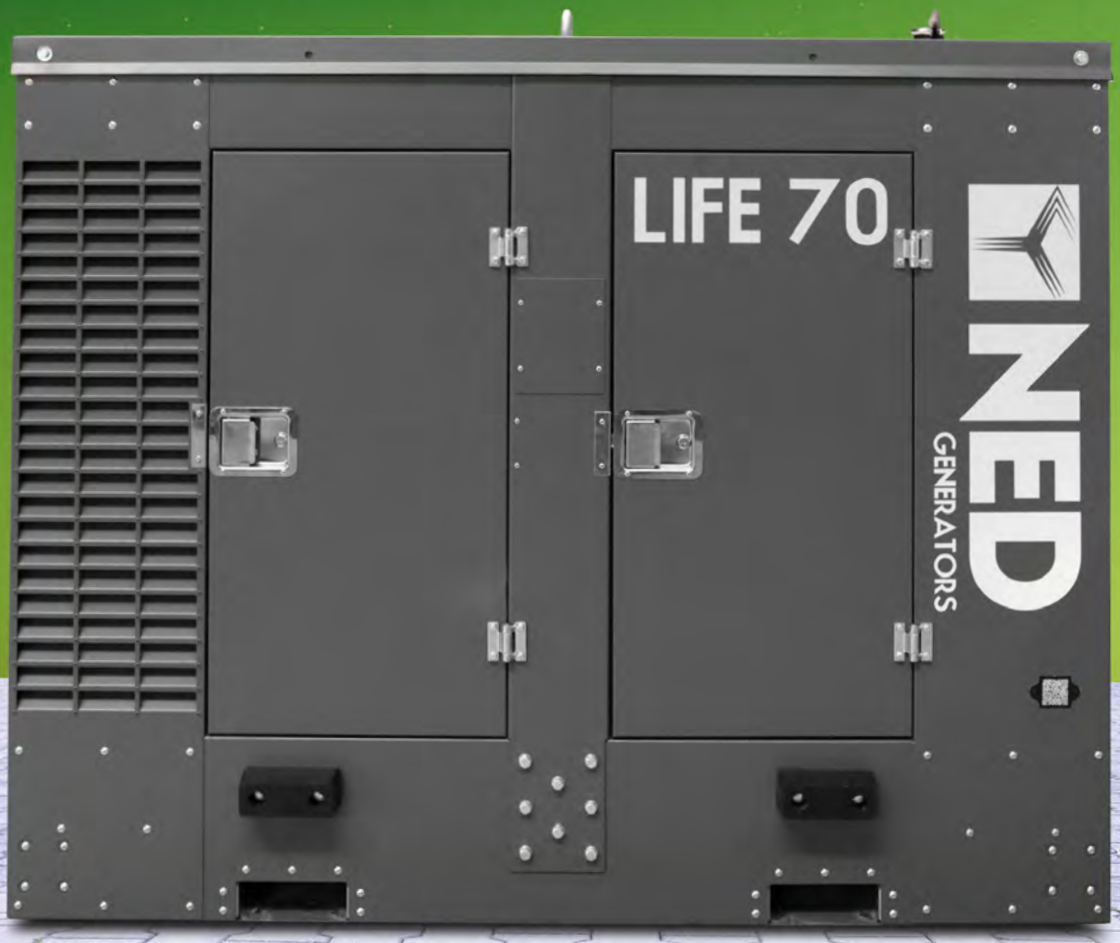
LIFE

A robust and reliable generator with an elegant **Italian design**, made with engines and accessories tailored to the specific needs of each customer, to give always the best in any operating condition and climate.

Robust and versatile



Diesel power generators without high quality isolation system

The LIFE generator by NED is engineered to deliver unparalleled reliability across a variety of challenging environments, from demanding construction sites to arid desert conditions and marine settings. **This model stands out for its exceptional power and adaptability to diverse energy needs, thanks to its high customisability.** LIFE is the ideal choice for those requiring a robust and versatile energy solution, capable of operating efficiently under pressure, ensuring top performance and durability at all times.

Best solution for

Construction Industry Grid TLC

LIFE70 is the best solution for construction sites, factories,suburban application and for occasional daytime use in urban centers

Power anywhere, anytime

Its soundproofed canopy at 70 db(A) sound pressure at 7 meters is made of cold galvanized steel and without any type of welding with epoxy powder coating, thus allowing a better seal over time and the possible replacement of any component of the canopy.
